

## DAILY MUSICAL TREAT AT STATE FAIR BY NATIELLO'S ROYAL HUSSAR BAND

Marianne Conway and Signor Ernesto Natiello.

**T**HIRTY-FIVE high-class musicians, including the famous bandmaster Signor Ernesto Natiello and noted soloists and instrumentalists, constitute the Natiello's Royal Hussar Band that will be the big feature at the Kentucky State Fair September 11-16. The management was very fortunate in securing this band, for there is none better in the country. All the men will be attired in white Hussar uniforms that give the band a distinction all its own.

Both the band and the soloists carry out Signor Natiello's long-known motto—"Give the people the music they want." This gives satisfaction all around and pleases everyone. The programs, which are changed daily, include both popular and classic selections.

The soloist with the band is Marianne Conway, one of the foremost concert sopranos in the United States. She has sung with the Boston Fiddlers, Theodore Roethkildt's Orchestra, Rich. Max Hornig's Orchestra and others of similar standing. Her voice is said to be very fine and has a range that enables her to sing all classes of pieces.

A feature that is attracting much

attention wherever the Natiello Band appears is the Una-Fon, a new instrument. It is played like a piano and has a rich tone that can be heard at great distance. This band is the first to include the Una-Fon in its equipment.

### Leader of Ability.

Ernesto Natiello, leader of the celebrated band of thirty-five pieces bearing his name, which will be a feature of the Kentucky State Fair, was born in Italy in 1878. Six years later his father, Signor Antonio Natiello, came to America and was appointed bandmaster on the United States Ship Brooklyn. He made Ernesto cornet soloist in a band he had organized in Philadelphia.

In 1889 Ernesto returned to Europe to finish his musical studies. Attaining the highest degree of perfection on the cornet, young Natiello came back to the United States as soloist with the famous Band of Milan. After an American tour, he returned to Naples and enlisted in the Italian army, serving as cornetist in his regiment for six months. Then he again came to America and joined a prominent band, shortly after which he recruited a musical organization of his own.

## NEW SADDLE HORSE STARS

To Prance for Prizes in Banner Rings at Coming Kentucky State Fair.

**W**HEN the pavilion gates swing wide for the entrants in the four greatest horse events listed for the fourteenth annual Kentucky State Fair, to be held September 11-16, it is surmised that not one of the proud high-steppers in the Championship Five-Gaited Saddle Horse ring formerly known as the Commissioner of Agriculture's Five-Gaited Saddle Horse Stake, held Friday night of the fair—the Kentucky Championship Roadster Stakes to be shown Tuesday night of the fair—the Kentucky Championship Fine Harness Stakes to be shown Wednesday night of the fair and the new feature, a Championship Three-Gaited Saddle Horse stake, which will be shown Saturday afternoon of the fair, will be recognized by horsemen or a horse-loving public as ever having performed on the tanbark oval of the great Kentucky show ring. While the list of nominators includes many of the former "stand-bys" of the fair it is well known to those posted in horse history that a phenomenal number of the most noted horses of the past decade owned by them have departed from Kentucky borders, among the list being R. E. Moreland's beautiful Cascade, which has been sold to a Pennsylvania horseman; Powhatan Stock Farm's Richlieu King, Kalarama Farm's brilliant prize winner, Rectina, who has also been sold to Pennsylvania; W. G. Shropshire's matchless Hazel Dawn, which was sold two seasons ago to Cuba's president, and her stable mate, Jack Barrymore, who was recently shipped to California as show horse at the Exposition; W. S. Nicol's Kentucky's Queen; E. D. Moore's My Idol, sold into New York; A. G. Jones & Son's Princess V., who has also been shipped to Pennsylvania; P. W. Ray's Sunflower, sold into Pennsylvania; Mrs. R. T. Lowndes' famous Mary Yandell Fox and Beautiful Kentucky's Choice, and Bob Moreland's Nicoll Plate, which has been sold into Missouri.

The above named have all figured in the celebrated Kentucky State Fair and other noted rings. In the fine harness and three-gaited class departed notables of horse-flesh are Gossip, champion three-gaited mare; Clara Bell, champion fine harness mare; Winchester, champion fine harness gelding; Ethel Mae and Gladys Conter, champion road mares, and Ebony King, champion road mare.

Instead of offering the former prize awards in a flat sum in connection with the four features mentioned

above, the State Fair management has announced the more tempting plan of listing all the entry moneys in a lump sum and adding to it for the Champion Five-Gaited Saddle Horse stake \$1,000 in cash and a handsome silver trophy; for both the Kentucky Championship Roadster stake and the Kentucky Championship Fine Harness Stake, \$500 additional to the entry moneys, and in the new three-gaited saddle horse stake the bonus added to the entry money will be \$200. As this stake is new to State Fair history, the entrants in same will, of necessity, be new to horsemen. In the fine harness stake the prospects are likewise for new blood. In the roadster stakes it is anticipated that the greatest lot of entries ever shown in a like event will be listed for the contest. Those who have purchased nominations above are:

## FIGHTING THE HESSIAN FLY

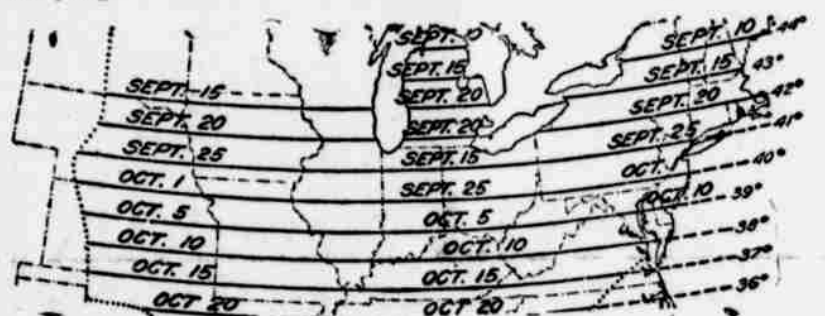

THE LIFE OF THE HESSIAN FLY (From the U. S. Dept. of Agriculture)

The life history of the Hessian Fly is shown above. The life of the adult fly is but a few days, probably but a week or less, and the great mass of the flies will appear at about the same time. If the wheat is sown after the flies appear by the time the wheat is up they will be gone and the plants escape the attacks of the fly.

Experiment stations urge you to sow wheat late in order to escape the Hessian Fly. Experience has taught you that the best yields are secured from plants that enter the winter with strong, healthy growth.

Solve this Problem by seeding late and hastening the fall growth by the use of 200 to 400 pounds of fertilizer containing 2% to 3% of available ammonia. Acid phosphate alone will not give the necessary, quick, strong, healthy growth. If the fly does not happen to be present this year, the good effects upon both the wheat and the grass seeded with the wheat, will repay many times the cost of the added ammonia. You cannot afford to be without this Fly Insurance.

Read Farmers' Bulletin 640 (U. S. Dept. of Agriculture) which says: "The application broadcast of some quick-acting fertilizer containing a large percentage of phosphate, made as soon as general infestation is apparent will cause the plants to tiller more freely and give them sufficient vigor to withstand the winter, and thus increase the number of healthy stems the following spring." \* \* \* While it may seem "far fetched" to bring forward as a preventive measure the enrichment of the soil, a fertile soil will produce plants that will withstand with little injury attacks that will prove disastrous to plants growing on an impoverished or thin soil. This is because a fertile soil will enable an infested plant to tiller freely, and these tillers will have sufficient vitality to withstand the winter and send up head-producing stems in the spring."

Plant On or After These Fly Free Dates (From U. S. Dept. of Agriculture)  
If drought prevails, the seeding date should be longer delayed

### UNCLE SAM'S EXPENSIVE GUEST

Uncle Sam has been playing host for over 150 years to one of the most menacing pests the country has ever known. It has cost him enormous sums. Its damage has been so great that the farmers in some localities have given up the growing of the crop it thrives on until it dies out. But it likes the treatment accorded here and seems disposed to hang on. It cares nothing that it has out-lived its welcome, but instead plods on year after year, and season after season taking the profits of our labor in the wheat fields.

What are you doing to stop the Hessian Fly? Your co-operation with your neighbor means as much to you as to him, and even if it didn't you owe a duty to your community to help in this eradication.

Remember these three things—sow late, prepare the ground well, and add available plant food to your soil. Give the young plants a late start to be free from the fly, but also give them a chance to obtain food by applying at least 200 pounds of fertilizer containing 2 to 4 per cent ammonia so that they may have a good growth before winter sets in.

"Swat the Hessian Fly" is the battle cry of the farming members of this big family of Uncle Sam, and won't you do your part to make the echo that much louder?

### Nearly As Much Second Season.

"The increase in yields of the crops following the one to which fertilizer is applied is often nearly as much as that secured in the crop fertilized. In one experiment at the Ohio Station when fertilizer was used on wheat, it caused an increase in yield of the other four crops in rotation, of 86 per cent of that secured in the wheat crop," says J. F. Hudson, a well-known farm writer. "Fertilizers applied to the corn crop will not be entirely used up and will benefit the crops following especially when applied broadcast or drilled in evenly where the field is in sod."

### Half the Battle Before Planting.

With wheat as with many other crops, the proper treatment of the seedbed and the supplying of plant food to carry along the crop with a good start and a steady growth, may be considered half the battle. As wheat is not cultivated after seeding, whatever cultivation is necessary must be done before the seed is put into the ground.

### Double Your Profits From Wheat.

Millers pay more per bushel for high quality wheat than they do for that which only grades number four or five, according to a Chicago Board of Trade Member. Ohio Experiment Station Bulletin 243 shows that high quality wheat and large yields go together, thus giving the farmer double profits. The experiments reported in Bulletin 243 show a yield of 8.45 bushels of wheat per acre with 51 per cent plump and 49 per cent shriveled kernels, where no fertilizer was used, against a yield of as high as 34.15 bushels per acre of which 94 per cent of the kernels were plump and but 6 per cent shriveled when the wheat was fertilized.

### As You Feed—So Shall You Reap.

"If I expect my horses to pull, I must feed them, and feed well. If I expect to grow 50 bushels of wheat to the acre, I must feed my wheat the same way," declares Murel Boaz, of Johnson county, Indiana. Last year Mr. Boaz raised 1,500 bushels of wheat that averaged 46 bushels to the acre. This year he is going to get over 50 bushels per acre, according to present indications.

### Wheat Yields, Beef Production.

"Those 50 to 55 bushels to the acre wheat yields don't 'just grow' any more than does a load of prime finished baby beefs. The cattle are never allowed to lose their calf fat, and are fed liberally of a balanced ration from the day they are born until they go into the car for market," says Clyde A. Waugh, in Farm and Fireside. "Record wheat crops must have plenty of a balanced plantfood ration to give them a quick start in the fall, to enable them to resist disease and insect attacks, to make enough growth in the fall to cover the ground before winter sets in, to start out early in the spring and to make a straight standing, early maturing, bumper crop of first quality."

### No One Would Work a Sick Horse.

No one would think of working a sick horse, yet there are farmers in almost every community who are continuing to work their sick soils, and with the usual result of poor crops. Fertilizing will help some, and lime is the corrective agent, but for the best results both should be used. With wheat, when limestone and fertilizer are used on the same land the yield is larger than when either one of these is used alone.

Children Cry for Fletcher's

# CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of *Charles H. Fletcher* and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

## What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic, all Teething Troubles and Diarrhoea. It regulates the Stomach and Bowels, assimilates the Food, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

GENUINE CASTORIA ALWAYS

Bears the Signature of

*Charles H. Fletcher*

In Use For Over 30 Years

The Kind You Have Always Bought

THE CENTAUR COMPANY, NEW YORK CITY.

## HUGHES' CHILL TONIC

(PALATABLE)

Better than calomel and quinine. (Contains no arsenic.) The old reliable. Excellent general tonic as well as a remedy for chills and fevers, malarial fevers, swamp fevers and bilious fevers. Just what you need at this season. Mild laxative, nervous sedative, splendid tonic. Guaranteed. Try it. Don't take any substitute. At druggists, 50c and \$1.00 bottles.

Prepared by  
**ROBINSON-PETTET COMPANY,**  
INCORPORATED  
LOUISVILLE, - - KENTUCKY.

## Fine Monumental Work

We have the largest, finest and best equipped Monumental Works in whole Western Kentucky. Carving and Lettering with pneumatic tools. An "up-to-the-minute" equipment for fine Monumental work. Thirty-seven years of honest business reputation and experience is back of every Monument that is sold by us. Remember there is only one Geo. Mischel & Sons in Owensboro and that is on East Main Street, Owensboro, Ky.

Get our prices before placing orders elsewhere.

**Geo. Mischel & Sons, Owensboro, Ky.**  
INCORPORATED.

## Life and Farm Insurance!

SEE

**S. P. McKINNEY & SON,**  
BEAVER DAM, KY.

District managers for the Mutual Benefit of Newark, N. J., which is one of the oldest Mutual Companies doing business in this State.

They will also insure your property in old and well established companies doing business in this State. The best is none too good. When in need of life or fire insurance call them over either 'phone—the Cumberland or Home. Office in rear of R. T. Taylor's drug store, Beaver Dam.
